Information Technology
2016-2018

1337 (42 Network)
Software Engineering
2019-2022

PROJECTS

RTv1 - *(School project)*
I made this project using C as the main language to create my first raytracer in a GUI.

Matcha - *(School project)*
This project is about creating a tinder-like platform using flask as a backend language and Javascript on the frontend, MySQL for databases.

Instagram-like web app - *(School project)*
This project consists of creating a web application similar to Instagram using the LAMP stack and Javascript.

DPI APP - (*Internship project*)
This project is about creating an API using React and expressJS to use with some hospital management platforms.
